

Copepods the Mini Beasts of the Ocean

Colour me and my ocean friends in!

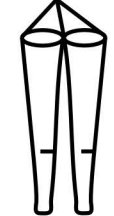

We are the plants of the sea. We take carbon dioxide from the air

I'm a copepod

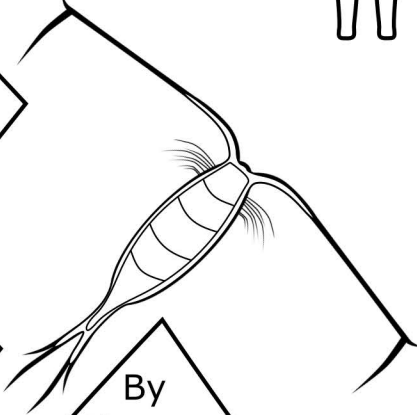

I eat lots of plants in the summer to fill my belly

These are bongo nets, used to catch copepods

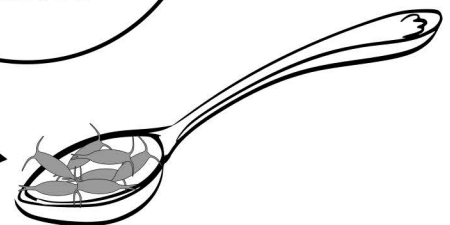

In the winter I relax in the deep sea

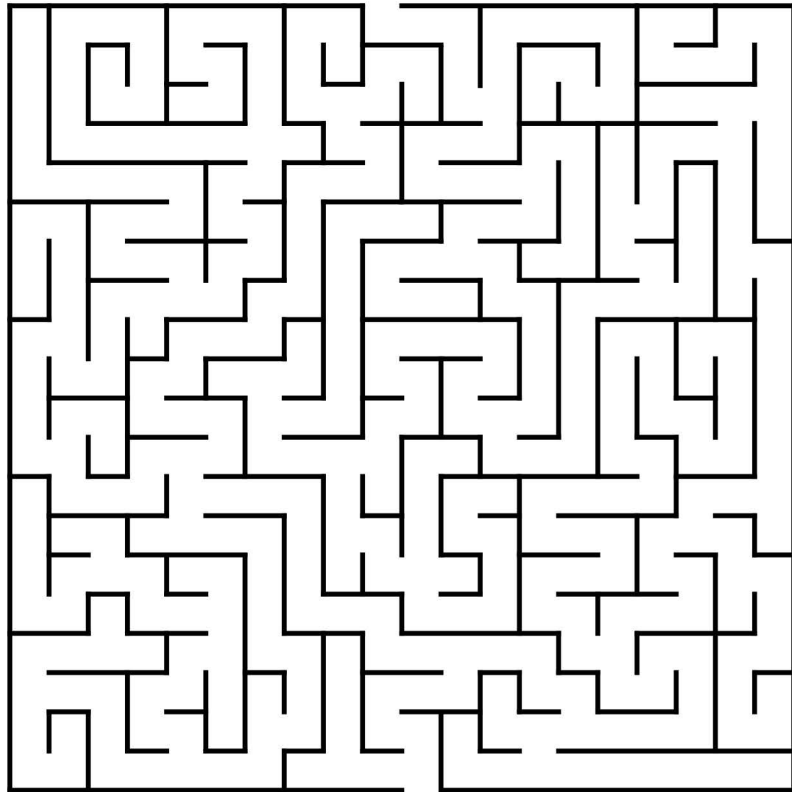

I take with me the carbon dioxide that plants took from the air

By the way, I'm pretty small, me and 3000 friends fit in 1 teaspoon!

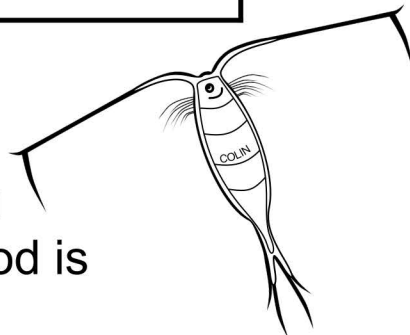

Therefore, I help to keep a healthy climate and planet

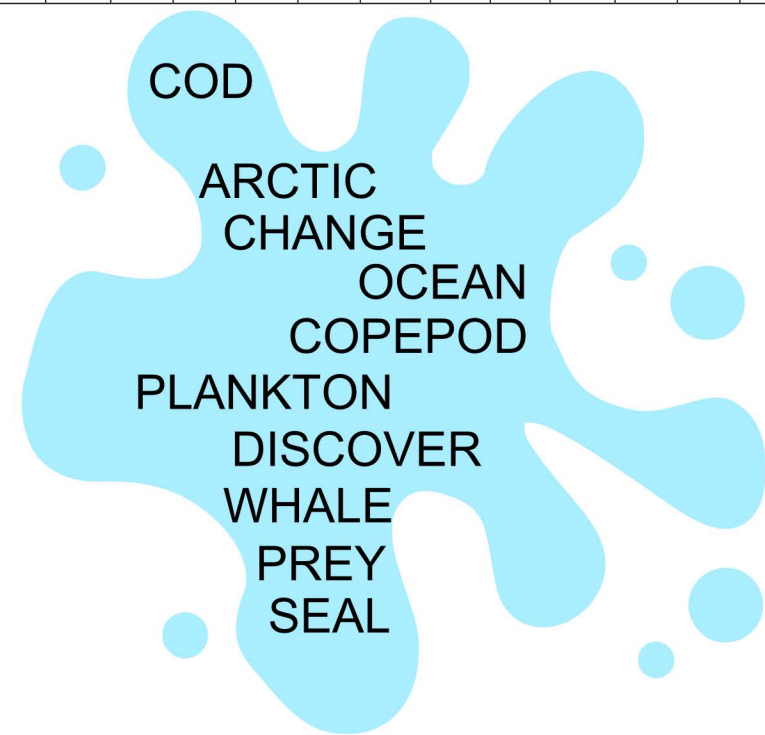

START

Help Colin the copepod make it to the sunlit ocean surface where his tasty food is
