How to Play

For two or more players. Shuffle the cards and deal all cards facing down. During play, players hold their pile of cards face down.

The player to the right of the dealer starts the game by choosing a category from the top card in their hand. Scores for that category are compared. The highest scoring player wins that round and collects all the cards played in that round.

The collected cards are moved to the bottom of the round-winner's pile of cards. The round-winner then takes the next turn and chooses a category from the new top card on their deck.

Play continues until one player ends up with all the cards and wins!
